Sequence 172, Application US/09252691B

GENERAL INFORMATION:
APPLICANT: Keith G. Weinstock et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ITTLE OF INVENTION: CLOACAE FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 107196.135
CURRENT APPLICATION NUMBER: US/09/252,691B
CURRENT FILING DATE: 1999-02-18
CURRENT FILING DATE: 1999-02-18
NUMBER OF SEQ ID NO 172
LENGTH: 477
TYPE: DNA
ORGANISM: Enterobacter cloacae
US-09-252-691-172
                                                                                                                                                                                                                                                                                         RESULT 8

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed and is derived by analysis of the total score distribution.

```
RESULT 1

US-09-543-407-9

Sequence 9, Application US/09543407

GENERAL INFORMATION:

APPLICANT: White, Aaron P.
APPLICANT: Collinson, S. Karen
APPLICANT: Collinson, S. Karen
APPLICANT: Kay, William W.
TITLE OF INVENTION: BACTERIAL FIMBRIAL SYSTEM FOR
FILE REFERENCE: 920043.406

CURRENT APPLICATION UNMBER: US/09/543,407

CURRENT FILING DATE: 2000-04-05

SOFTWARE: FRESENGE FOR Windows Version 4.0

LENGTH: 48

TYPE: Days

TYPE: Days

Sequence 9, Application US/09543407
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           იი იიიი იიიი

                                                                                                                                                                                                                                                                                                                                                                                                                         Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

```
RESULT:1

US-09-543-407-19

Sequence 19, Application US/09543407

GENERAL INFORMATION:

APPLICANT: White, Aaron P.

APPLICANT: Doran, James L.

APPLICANT: Collinson, S. Karen

APPLICANT: Kay, William W.

TITLE OF INVENTION: BACTERIAL FIMERIAL SYSTEM FOR

TITLE OF INVENTION: PRESENTATION OF HETEROLOGOUS

FILE REFERENCE: 920043,406

CURRENT APPLICATION NUMBER: US/09/543,407

KUMBER OF SEQ ID NOS: 59

SOFTWARE: FastSEQ for Windows Version 4.0
